

Safety precautions for 2K waterborne polyurethane sealers

1. General information

Work only in well-ventilated areas or use appropriate exhaust ventilation.

Avoid direct contact with skin, eyes and respiratory system.

2. Personal protective equipment (PPE)

Respiratory protection: Wear a respirator with a filter (at least A2P2) to prevent vapours and aerosols.

Eye protection: Use safety goggles or face protection to prevent splashing.

Hand protection: Wear chemical-resistant gloves (e.g. made of nitrile).

Wear suitable protective clothing and closed-toe shoes to minimise skin contact.

3. Handling and processing

Mix both components thoroughly before use, according to the manufacturer's instructions.

During processing, avoid contact with other materials that could react chemically.

Do not allow excess sealant to enter drains or the environment.

4. Health and environmental protection

Some components may cause allergic reactions or skin irritation. Seek medical attention if there are signs of allergy or irritation.

Do not breathe vapours for long periods as they may cause respiratory irritation.

Do not dispose of the product in natural waters – treat residues in accordance with local regulations for hazardous waste.

5. Emergency measures

In case of skin contact: Wash off immediately with plenty of soap and water. If irritation persists, seek medical attention.

In case of contact with eyes: Rinse thoroughly with plenty of water and seek medical attention immediately.

If vapours are inhaled: Move to fresh air and consult a doctor if symptoms persist.

If swallowed: Seek medical attention immediately and show the container or label.

6. Storage

Store in a cool, dry place, away from direct sunlight and heat sources.

Always keep container tightly closed and out of reach of children.

By following these safety precautions, health risks and environmental damage can be minimised when using 2K water-based polyurethane sealants.
